Paper Phrog on card	Vulnerable enemies take extra damage; attacks show it while **any enemy is Vulnerable**.
Intimidating Helmet on card	4 Block whenever you spend **2+ energy** on a card; such cards show it.

Counts are read from the game's own values, so badges always match the relic bar and power icons. The optional setup bar lists the nine run-persistent relics, whose counters carry between combats: Pen Nib, Nunchaku, Tuning Fork, Iron Club, Joss Paper, Pendulum, Happy Flower, Fake Happy Flower, Pollinous Core. Not tracked (by design): locks such as Sloth/Smoggy/Ringing and Normality, end-turn reversals (Tender, Monologue), Unsettling Lamp, and out-of-combat counters — the game already communicates those. · Micro Assistant · github.com/davekalina/spire2-micro-assistant
